PROJECT AND SERVICES DESCRIPTION

The project concerned many various interior, as well as exterior works at the Residence.

The main goal of the mission was to assist the Building Owner by preparing and supervising:

- The general adaptation of the existing situation to the Norwegian norms and requirements for the disabled, including the creation of an access ramp ;
- The preparation and supervision of the conformity and compliance works concerning the existing electrical installation ;
- The complete refurbishment of the main parking area, including the preparation of the necessary Building Permit ;
- The complete refurbishment of the rainwater storage tank, as well as the exterior sewage network ;
- The complete refurbishment of the existing roof ;
- The creation of a new semi-industrial kitchen ;
- The complete renovation and redesign of the existing representative terraces.
